Oil Purification Systems and Cascade Sierra Solutions Announce Strategic Partnership

Partnership focuses on promoting state of the art technology to reduce consumption of fuel and pollution among the nations long-haul truck fleet.

Shelton, Conn. – October 22, 2007 – Oil Purification Systems (OPS) (www.ops-1.com), developer and manufacturer of the OPS-1™ on-board oil refining system, today announced a strategic partnership with Cascade Sierra Solutions (CSS), headquartered in Coburg, OR. CSS, through their Technology Showcase Centers, will provide OPS-1™ production information, sales support, and financing support to their customers operating in the I-5 Corridor in Washington, Oregon, and California.

“The CSS concept is a great example of how public and private enterprise can work together, making clean technologies available, and affordable to the owner operator and small fleet customer,” said Mitch Weseley, OPS president and CEO. “We fully support the CSS mission, and look forward to a long and successful partnership.”

According to Sharon Banks, CEO of CSS, “The Showcase Centers not only provide an outlet to highlight new energy reducing technologies, but also, a one stop shop by breaking down the cost barrier of upgrading your equipment”. CSS is currently promoting over 40 technologies, and hopes to facilitate the upgrading of 30,000 trucks over the next 10 years. “The OPS-1™ technology is significant in that it eliminates waste while saving money. The OPS product highlights the benefits of taking a simple step forward in reducing demand for fossil fuel, and this is really how we can make a

difference. Small steps add up to a significant change in our consumption and ultimately our carbon footprint”.

About Oil Purification Systems

Oil Purification Systems, Inc. manufactures the OPS-1™ on board oil refining system which removes the solid and liquid contaminants from engine oil, virtually eliminating the need for routine oil changes. OPS-1™ is used by hundreds of fleets on thousands of vehicles and generators in trucking, busing, construction, mining and many other applications. OPS-1™ users have dramatically reduced oil consumption, cut oil maintenance costs by 80 percent, and extended equipment life. Most OPS clients pay for their investments within six months. OPS-1™ is also an effective solution for corporate environmental sustainability programs. Founded in 2002, OPS is headquartered in Shelton, Conn. and has production facilities in Waterbury, Conn. About Cascade Sierra Solutions

Cascade Sierra Solutions (CSS) is a non-profit organization dedicated to saving fuel and reducing emissions from heavy-duty diesel engines. CSS operates in the States of Washington, Oregon and California with a primary focus on the Interstate 5 corridor.

CSS is in the process of establishing outreach centers – strategically located with major truck stops. While the primary target of CSS outreach is the long-haul operator, the centers provide education and incentives for local fleets as well.
